

Sustainable Supply Chain Management

A sustainable supply chain approach based on responsible sourcing helps us reduce risks and build trust among our stakeholders.

For this reason, the sustainability approach is at the center of all our business processes, from the production of our raw materials to sales and marketing, and also includes our social development efforts.

While our Sustainable Supply Chain policy enables us to achieve our commercial goals, it creates a positive social impact on the lives of people working in the same supply chain and reduces our impact on the environment. We strongly believe that these efforts will benefit both KEMİTEKS and our supplier stakeholders; We create the right conditions for sustainable business growth by helping society and the environment improve.

Our Sustainable Procurement policy includes a set of Mandatory Requirements that our suppliers must meet in order to do business with KEMİTEKS. Beyond that, KEMİTEKS is committed to working with our suppliers on the path of continuous improvement.

KEMİTEKS accepts the 10 Principles of the UN Global Compact and oversees the implementation of these principles throughout the entire supply chain. (<https://www.unglobalcompact.org/what-is-gc/mission/principles>). Full compliance with these norms specified in the KEMİTEKS Supplier Code of Conduct, prepared for this purpose, is the responsibility of all suppliers and is a part of subcontractor service contracts. In this way, in KEMİTEKS supply operations, preventing child labor, preventing forced and compulsory labor practices, respecting the union rights of employees, complying with the principles of occupational health and safety, complying with the norms related to the activities, ILO Conventions and legal regulations, discrimination, bribery and Issues such as the prevention of corruption are guaranteed.
